EDUCATION

Belarus State Aviation Academy

Civil Aviation Engineer

Percentage: 80%

Belarus

September 2012 - July 2017

EXPERIENCE

Milli San | Full-Stack developer

Ashgabat, Turkmenistan | September 2021 - May 2022

I was involved in the development and support of web and mobile solutions. We were writing the backend logic ourselves. We used GraphQL schemas to describe structures and queries.

Technical stack:

- Javascript (Typescript) - React - React Native - Next JS
- Node JS - PostgreSQL - GraphQL - Docker

IOGRU | Full-Stack developer

New York, USA, Remote | August 2022 - December 2022

We created our own CRM system based on Berry Dashboard. I participated in the development of both front-end and back-end logic. we built a platform that monitors and grows various greenhouse plants.

The project included team tasks with role-based assignments, a Kanban board, a calendar, and irrigation cycles. We also integrated microcontrollers that report humidity/temperature data, etc

Technology stack:

- React - Next JS - Material UI - Redux - React Query
- Nest JS - Redis - PostgreSQL - Sequelize

Jan Technology | Middle+ Frontend developer

Ashgabat, Turkmenistan | May 2023 - May 2024

Initiated and managed the development of a video streaming platform for Turkmenistan, analogous to YouTube, coordinating all project phases from ideation through to launch.

Led a cross-functional team, including a backend developer specializing in Golang, to ensure cohesive development efforts and a shared project vision.

Frontend Development & Mobile-Friendly Design: Developed the entire web client side, leveraging both frontend and mobile development knowledge to create a user-centric, responsive design.

Disarcs | Full-Stack developer

Spain | December 2024 - July 2025

I am developing a complex mobile/web quiz applications that allows users to test their knowledge through various quiz formats, including mock exams, difficult-question challenges, and flashcard-based learning.

My role includes:

Backend development (API design, database management, user authentication)

Frontend development (responsive UI, interactive quiz flows)

Landing pages & User dashboard (tracking progress, managing quizzes and exams)

Skyfort Capital | Full-Stack developer

Dubai, Remote | August - Present

Building a wealth management platform used by investors and financial advisors to create, manage, and execute wealth plans, track assets/cash flows, and collaborate on financial decisions.

Responsibilities & Contributions

Developed end-to-end features across frontend and backend, owning delivery from requirements to production.

Implemented core backend modules around wealth plans (plan structure, calculations/logic, workflows), plus documents/files management and related APIs.

Built frontend features for assets & money management, document workflows, and investor/advisor UX flows.

Integrated real-time functionality using WebSockets for live updates and collaborative interactions.

Technology stack:

React MobX NestJS Drizzle ORM PostgreSQL WebSockets OpenSearch Logstash NGINX AWS

SKILLS

Programming Languages: Javascript, Typescript, HTML, CSS, Node JS, PHP, Solidity, Python
Libraries/Frameworks: React, React Native, Next JS, Nest JS, HLS
Tools / Platforms: Material UI, React Query, Redux, Docker, Git, GraphQL, MinIO
Databases: MySQL, PostgreSQL, MongoDB
